## Aftissat Wind Farm, Morocco

Windhoist are delighted to be returning to Morocco where we have previously installed 131 Siemens turbines at the Tarfaya Wind Farm and 28 GE turbines at Akfenir Wind Farm.

On this occasion, Windhoist will be erecting 56 Siemens 3.6-130 x 100mhh wind turbines at the Aftissat Wind Farm which is 45km South of Boujdour in the Western Sahara – and only a short hop from Tenerife or Gran Canaria. The \$391m wind farm is being developed for Société Energie Eolienne du Maroc (EEM) who will use the impressive 201.6MW of energy to supply industrial companies in Morocco.
