## M/V Akademik Primakov successfully completed 3D seismic operations offshore Morocco

On 19 March 2018 the research vessel Akademik Primakov successfully completed 3D seismic operations offshore Morocco in the size of 1000 sq. km for Geox Ltd. The survey was carried out with excellent performance rate and according to the work schedule, the customer highly appreciated the professionalism and efficiency of the vessel crew. On 25 March 2018, upon the recovery of seismic equipment, the vessel is expected to call at the Moroccan port of Agadir for the re-exportation and crew change. Subsequently, the Akademik Primakov will be preparing for further operations.
